

## ESRP Grant Proposal - Lower Big Quilcene Visual Scope of Work

**Figure 3**

Final project location and configuration TBD based on proposed work, analyses, and project goals. While specific restoration actions have been recommended for this area in various reports (see A.3. in proposal) and will be considered in alternatives development, it is critical for the integrity of the project process and maintaining trust with project stakeholders that no pre-conceived configuration of these actions be presented prior to the start of this project phase.
