COSTS

Page	Grant Manager Comment
Cost Summary	Thanks for keeping match to ~15% will make it easier to reimburse out of pocket costs.

APPLICATION QUESTIONS

Page	Grant Manager Comment
Restoration Questions	We've had a number of bulkhead removal projects run into issues with cultural resources so that the scope of the restoration was decreased to avoid impacts to middens. It could be useful to include some cultural resource investigations to manage risk -- if funded we would expect to see the bulkhead removed. Any way to have the county archaeologist assess the likelihood of cultural resources impacts from removal of the bulkhead? It's an eligible cost.

ATTACHMENTS

Page	Grant Manager Comment
Attachments	<p>Will need an APE -- might include one for the bulkhead removal area. Section Township Range with topo and outline of area where ground disturbing activities will occur.</p> <p>Salmon Proposal: Please be explicit to manage expectations of what can be afforded with this \$200K. Consider scaling back the answer -- only respond to the question of location.</p> <p>4C might want to also discuss cultural resources and potential of limited risk to removal of the bulkhead -- excellent if your archaeologist could look in the database and support a low risk to CR in the area.</p>
