PROJECT DETAILS

Page	Grant Manager Comment
Project Description	<p>I added some text to clarify the type of structures being added. But I think other clarifications are needed:</p> <ul style="list-style-type: none"> o Since the design is funded by 14-1504, should mention of the design be deleted from the description or will it include some wrapping up of the design? o It refers to 0.6 miles of stream, but the proposal refers to 0.5 miles in #2 and 0.6 miles in 35A. The metrics say 0.5 miles. Please revise all of these, as needed. o Also, please clarify that you are proposing to implement only Phase 2 of the 2 phase project to ensure there is no confusion.

METRICS

Page	Grant Manager Comment
Restoration Metrics	<p>o Channel structure Placement, acres of streambed treated: You said 9 acres treated, but I'm not sure if that makes sense. 0.4 miles x 15 yds = 2.2 acres. Please double check the number.</p>

ATTACHMENTS

Page	Grant Manager Comment
Attachments	<ul style="list-style-type: none"> o Does the phase 1 and 2 site plan (attachment #219615) need to be updated? o 90% plans: They are fine, but for the future, you might consider using a code to ID any archaeological sites. These sites are sensitive and confidential and it's best not to point them out to the public. o Response to review panel comments: I'm sorry if there was confusion, but you do not need to respond to comments on the comment form (we used to do this but gave that up in favor of asking you to respond directly in the project proposal). Feel free to delete the comment form provided everything is in the project proposal (or you can leave it if you wish). o If you have any other updated design reports, go ahead and attach them. If not, I think it's fine as is.
