METRICS

Page	Grant Manager Comment
Acquisition Metrics	Habitat Acres table attached in PRISM, along with habitat types map. This \$300K value seems high for a single development right -- are you sure you've got the cost estimate right? Might you need a wetland delineation to define the developable area?
Overall Project Metrics	May be an issue with match if sponsor chooses to bill indirect to the Salmon funding. That would not be eligible for WWRP and may preclude the ability to have one project agreement for both funding sources. The issue has come up re: the use of state salmon funding as programmatic match for federal funding, which is requiring the funds align to federal conditions which include the new Omni Circular. More information will follow over the coming months as RCO develops necessary policy.

COSTS

Page	Grant Manager Comment
Acquisition Cost Estimates	Seems expensive for habitats that are protected by CAO -- you might consider explaining in more detail the threat in your salmon proposal.

APPLICATION QUESTIONS

Page	Grant Manager Comment
Overall Project Questions	Articles of incorporation Article VI contain a section on dissolution.
