PROJECT DETAILS

| Page | Grant Manager Comment |
|------------------------|--|
| Worksites & Properties | Please make sure you are able to track your expenses by worksite; E-billing will need you to submit costs for each worksite. |
| Property Details | Landowner agreements expire 10 years after the project agreement is closed complete. |

METRICS

| Page | Grant Manager Comment |
|-------------------------|---|
| Restoration Metrics | Very thorough. |
| Overall Project Metrics | Previous challenges securing match related to estimating the cost of local permits, which became hard to substantiate as there was no fee to waive, and no local government staff time spent on reviewing designs. Just want to be sure AASF has plenty of alternatives for match, as we heard from the county that the large wood donation from the PUD wasn't likely to be available next year. |

ATTACHMENTS

| Page | Grant Manager Comment |
|-------------|---|
| Attachments | The designs that are uploaded look like they are conceptual -- do you have preliminary designs available? See manual 18 Appendix D-2 for what constitutes preliminary design deliverables. Revisit the response to the review panel in the salmon proposal, as I believe they are requesting preliminary designs. Also --you can delete the response to my comments -- you've incorporated those into your application so no need for a comment by comment response to my notes. Let me know if you have any questions! |
