Task Cost: \$310,669.00

Task Title: Acquisition

Task Description:

1. The Lake Creek Wetland Complex Protection (#15-1172) This acquisition project is sponsored by the Skagit Land Trust and will permanently protect high quality steelhead habitat on the West Fork of Nookachamps Creek. It encompasses 50.3 acres, including 46 acres identified in the National Wetland Inventory and a small wooded upland area. It encompasses 3,900 feet of Lake Creek, which moves freely across the property in deep braided channels, and 1,000 feet of Big Lake shoreline. Through fee simple purchase, this project will extinguish residential development rights, prevent commercial timber harvest and prevent other potentially damaging private recreational uses of the site, ensuring permanent protection of the property and its ecosystem functions. The project site is one of the largest intact functioning wetlands in this section of the Nookachamps, and it is potentially significant juvenile rearing habitat for multiple salmonid species. It has high quality vegetative cover, numerous channels, pools, and ground water inputs. These funds will purchase two additional properties to increase the area protected and remove potential agricultural impacts.

A. The RECIPIENT will utilize their project sponsor, Skagit Land Trust, to negotiate the terms of purchase with the landowner, and draft the purchase and sale agreement using the RECIPIENT's conservation easement format to ensure that the perpetual purpose of this property is to support the intent of this contract and continued state interest.

B. The Skagit Land Trust will hire and manage contractors, obtain bids from appraiser, and surveyor and ensure contracts are fulfilled. The Skagit Land Trust will conduct title review and address title exceptions.

C. The Skagit Land Trust will purchase two parcels on 17-acres of the Lake Creek wetland.

Deliverables: Copy of sale agreement and appraisal, documentation of land acquisition, and legal agreement

2. The Twisp River – Poorman Creek Phase II Protection Project (#15-1251) is sponsored by the Methow Conservancy in Okanogan County. The purpose of the project is to acquire a permanent 29-acre conservation easement on a site that contains 2,680 ft of riverfront and high-quality riparian and floodplain habitat along the lower Twisp River. The conservation easement restrictions include prohibitions on residential development, riparian vegetation removal, bank armoring, and other activities within riparian and floodplain habitat. By permanently protecting existing high-quality riparian and floodplain habitat, the area can continue to provide important salmon habitat functions in perpetuity. ESA-listed species that will benefit include spring Chinook, steelhead, and bull trout. This funding will provide a portion of the overall acquisition costs and fulfill project match requirements.

A. The RECIPIENT will utilize their project sponsor, Methow Conservancy, to negotiate the terms of purchase with the landowner, and draft the purchase and sale agreement using the RECIPIENT's conservation easement format to ensure that the perpetual purpose of this property is to support the intent of this contract and continued state interest.

B. The Methow Conservancy will hire and manage contractors, obtain bids from appraiser, and surveyor and ensure contracts are fulfilled. The Methow Conservancy will conduct title review and address title exceptions.

C. The Methow Conservancy will purchase a conservation easement on 29-acre property on the lower Twisp River. Additional funding beyond this contract will also be used for this purchase.

Task Title: Riparian Restoration

Task Description:

1. The Hobbit Corners Floodplain Restoration Project (#11-1555) is sponsored by the Skagit Fisheries Enhancement Group in Skagit County. The purpose of this project is to improve floodplain function by restoring native floodplain vegetation and controlling invasive plant species that spread via floodplain disturbance during high flows. In the short-term, improvements to side channel habitat quality will be achieved by installing large wood with rootwads, that will increase habitat complexity and create low velocity margin habitat for juvenile salmon rearing. ESA-listed Chinook salmon and Steelhead will benefit from the project. The project area consists of a conservation property located along the Sauk River. The project sponsor will use the funds to plant additional conifers to improve habitat diversity, establish large wood recruitment, and ecosystem function of the riparian buffer along the side channel that will also improve water quality.

2. The Skagit Watershed Riparian Restoration and Stewardship Project (#13-1054) is sponsored by the Skagit Fisheries Enhancement Group, in partnership with the Skagit River System Cooperative, and conservation landowners in the Skagit River basin. The purpose of this project is to restore habitat and water quality for ESA-listed Chinook salmon and other species by actively restoring native riparian and floodplain forest vegetation on a number of sites throughout the Skagit River watershed. Sites were identified based on the following criteria: a) Located in floodplain areas adjacent to mainstem, side channel, or off-channel habitats that are likely to be used by Chinook salmon b) Currently have limited or impaired native vegetation conditions, and typically contain invasive species c) Located on public or conservation property. The project sponsors will use the funds to purchase and install native riparian vegetation on six sites, where extensive tree mortality occurred on previously restored areas as a result of recent drought conditions.

3. The Martin Slough Riparian Restoration Project (#14-1263) is sponsored by Skagit County Public Works and will restore 26 acres of riparian buffer adjacent to an established Conservation Reserve Enhancement Program (CREP) along the Skagit River and Bow and Martin Sloughs near Rockport, on the left bank of the Skagit River, just upstream of SR530. Skagit County owns the property and will oversee restoration on the site. The 65-acre Martin Slough property, purchased with a SRFB grant (99-1719) in 2001, currently has approximately 22 acres of riparian corridor along Martin and Bow Sloughs. This project will remove the non-native vegetation and replant the riparian area on the remaining 23 acres that were ineligible for CREP.

4. The RECIPIENT will work with ECOLOGY's Project Manager to complete a Section 319 Load Reduction Report form for riparian restoration work performed, at project closeout. The RECIPIENT is expected to report each site's location (latitude and longitude), what BMPs were installed, and the size (length, area, and other applicable units).

Task Goal Statement:

Restore native riparian and floodplain vegetation and to improve water quality and ecosystem function in the lower and upper Skagit River watersheds.

Task Expected Outcome:

*Plant native conifers and perform maintenance on 18 acres of the Sauk River (Hobbit Corners)

*Replace dead plants and control invasive species on six sites in the Upper and Lower Skagit watersheds due to

If this Agreement is so terminated, the parties shall be liable only for performance rendered or costs incurred in accordance with the terms of this Agreement prior to the effective date of termination.

Non-Allocation of Funds. ECOLOGY's ability to make payments is contingent on availability of funding. In the event funding from state, federal or other sources is withdrawn, reduced, or limited in any way after the effective date and prior to the completion or expiration date of this agreement, ECOLOGY, at its sole discretion, may elect to terminate the agreement, in whole or part, or renegotiate the agreement, subject to new funding limitations or conditions. ECOLOGY may exercise any of these options with no notification or restrictions.

If payments have been discontinued by ECOLOGY due to unavailable funds, the RECIPIENT shall not be obligated to repay monies which had been paid to the RECIPIENT prior to such termination.

RECIPIENT's obligation to continue or complete the work described in this Agreement shall be contingent upon availability of funds by the RECIPIENT's governing body.
